Information Disclosure Statement

The information disclosure statement filed March 20, 2002 has been considered and has been made of record.

Response to Amendment

The preliminary amendment filed March 30, 2003 is acknowledged; claims 1-24 are presently pending.

Specification

The abstract of the disclosure is objected to because it appears on two separate pages. It should appear on only one separate in paragraph form not exceeding 150 words. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 7, 10, 15 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 10-7906A (Chisso Corporation).

JP 10-7906A (Chisso Corporation) discloses a varnish based on a polyamide acid which can provide a film having excellent electric characteristics, no significant coloring and excellent transparency by condensing a tetracarboxylic acid dianhydride with a diamine; wherein the varnish comprises a polyamide acid obtained by reacting a tetracarboxylic acid dianhydride with a diamine, a partially imidated polyamide acid and a polyimide, wherein the diamine is composed mainly of bis(aminomethyl)-bicyclo-[2,2,1]-heptane denoted by formula (1), the tetracarboxylic acid dianhydride is preferably an aromatic tetracarboxylic acid dianhydride, an aliphatic tetracarboxylic acid dianhydride (including alicyclic tetracarboxylic acid dianhydride, etc.) and the varnish is employed to prepare a liquid crystal aligned film; which anticipates the claimed invention. See English language abstract.

Claims 2-3, 5-6, 8-9, 11-14, 16-17 and 19-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sawai is cited to show the state of the art of preparing polyamic acid, polyimide film.
